Advanced Security

Employee cybersecurity training, DLP, mobile device management, advanced email security.

Compliance Security

Risk assessments, cyber insurance reviews, Zero Trust framework, privileged access management.

Add-Ons

SSO setup, data classification, innovation protected by robust security.

What Sets Us Apart?

Direct Access

Reach any team member, including the CEO, directly for open communication without red tape.

Month-to-Month Contracts

Flexible agreements with the option for longer terms, putting you in control.

Technology Coaching

Expert guidance to effectively leverage technology in your industry.

Technical Account Management

Access practical, tailored solutions without sales pitches—just genuine support.

No-Geek Speak

Communicate with our team in clear, jargon-free language for better understanding.

How We Bill

Transparent Billing

Consistent and timely invoicing with no surprises.

No Nickel-and-Diming

Anything under 4 hours is fully covered in our flat-rate plan—no extra fees.

Logistics Support

We can provide depot service for managing computer equipment inventory, which is particularly useful for remote workers and those with virtual offices.

Flexible Agreements

No long-term contracts required.

What Makes Us Different

Direct Access

US

We provide **direct contact details** for our employees, including the CEO, to ensure clear and open communication without any red tape.

THEM

Submit a form and **wait for a callback**.

Technical Account Management

US

We provide practical, technical solutions tailored to your needs—**no sales pitches, just real support**.

THEM

Your account is handled by salespeople focused on meeting quotas, often **prioritizing selling over addressing your actual needs**.

Month-to-Month Contracts

US

Flexible, month-to-month agreements **put you in control**, with longer-term options available if you prefer.

THEM

Service is prioritized at the start and renewal time, but the **quality often drops** in between since you're **locked into a contract**.

24/7 Support

US

24/7 support is included—**no extra charges for after-hours**, ensuring **seamless help** across locations and time zones for most of our plans.

THEM

After-hours support often comes with **hefty emergency fees**.

Technology Coaching

US

Expert coaching to **leverage technology** in your industry, so you're **always informed** and never left wondering what you don't know.

THEM

Quarterly Business Reviews are often used to **justify value rather than provide proactive support**.

Cybersecurity

US

We take a **proactive approach** with personalized solutions, continuous monitoring, and training to keep your business **protected and prepared**.

THEM

Issues are often addressed only after they happen, **leaving your business exposed to potential risks**.

20+ Years of CKT

2003

Common Knowledge Technology Company Launch

From humble beginnings as a small startup in 2003, Common Knowledge Technology has grown exponentially, expanding our services and client base across multiple sectors.

Peter Horewitch Becomes Sole Owner

In 2012, Peter seized the opportunity to buy out his company's initial partners. This move made him the sole owner and set the stage for a whole new chapter in Common Knowledge Technology's story.

Amazon Best Selling Book

Co-Authored by Common Knowledge Technology President, Peter Horewitch, "Easy Prey" achieved the prestigious status of being an Amazon best seller in 2016.

Recognized In Top 500 Managed Service Providers Globally

In 2017, Common Knowledge Technology was named one of the Top 500 IT MSP Companies in North America and globally listed on the Channel Futures MSP 501.

Colorado Companies To Watch Award

Every year, hundreds of organizations are nominated for the prestigious Colorado Companies To Watch Award, but only 50 winners are chosen. In 2023 Common Knowledge Technology was honored with this award, and recognized as a company that fuels the economic fire of the state.

20 Year Anniversary

Common Knowledge Technology celebrates their 20 year anniversary in August of 2023. We are deeply grateful for the unwavering support of our incredible clients. Your trust in us has driven our innovation, putting us at the forefront of the industry. Thank you for an amazing journey so far!

Proud Winners of the Tech Elite 250 Award

We proudly joined the ranks of the Tech Elite 250, highlighting our commitment to top-tier partner programs and technology certifications. This acknowledgment underscores our dedication to delivering exceptional solutions for clients across North America.

2025

Expanding Services Through Acquisition

Common Knowledge acquired VirtueCom and DevDen Software Development. With this move, we enhanced our offerings in cloud solutions, VoIP services, and software development, all under one roof. Together, we became stronger and better equipped to support our customers.

Our Cybersecurity Method

01

Basic Security

Our **level one** standard security offers fundamental protection to safeguard your digital assets.

- ▼ **Next Generation Security**— Protect servers and workstations with the latest endpoint security technology. Provides ransomware remediation and detailed forensic reports.
- ▼ **Backups**— Data currently backed up to local storage, cloud storage, or both. Backups are monitored daily and tested regularly. Disaster recovery
- ▼ **Multi-Factor Authentication**— Configure MFA for Microsoft, Google, and as many line of business applications as possible.
- ▼ **Firewall and Remote Access**— Maintain all firmware and updates. Configure SSL VPN and MFA access.
- ▼ **Patching**— Maintain updates on all servers and workstations. This includes operating system, mainstream software (i.e. Microsoft Office), and many line of business applications.
- ▼ **Best Practices**— Turn off IMAP/POP, set up SPF, DKIM, DMARC for email, close all unnecessary ports, increase password requirement complexity, delete unused accounts, geofencing, etc.
- ▼ **Email Security**— 3rd party email filter service to prevent malicious emails from getting through to end users. Includes phishing simulations
- ▼ **Cyber Security Awareness Training**— Can you spot a phishing or spoofing email? Is it safe to click on the link? Educate your employees with both in-person and online training options. Upon request.
- ▼ **Hard Drive Encryption**— Configure encryption on all supported devices.
- ▼ **Dark Web Monitoring**— Be notified when employees' credentials are exposed on the Dark Web. Know when to change your passwords to protect your assets.
- ▼ **Cyber Liability Insurance Policy Review**— Be confident you're covered in case of a cyber attack. Have an expert review your policy today

02

Advanced Security

Level two specializes in insurance, providing the necessary safeguards to ensure you're fully covered and compliant with industry standards.

- ▼ **Advanced Email Security**— Includes Teams protection, scans for malicious links and files, Account Takeover Protection
- ▼ **Password Management**— Protect your passwords for both personal and business accounts. Manage access to company data and be able to add/remove users from a single point.
- ▼ **Standard SEIM**— Security event information manager, real time analysis of logs from workstations, servers and cloud services like Microsoft Office 365.
- ▼ **Zero Trust**— Lock down your systems (remove local admin rights), set applications to only allow approved actions.

03

Compliance Security

Level three advanced security provides state-of-the-art measures to secure your data and infrastructure from even the most sophisticated attacks.

- ▼ **Compliance SEIM**— Security event information manager, real time analysis of logs from workstations, servers and cloud services like Microsoft Office 365.
- ▼ **Data Classification**— Guidance for conducting an inventory of data and classify which data needs to be secured.
- ▼ **Internal Policy Review**— Assist in designing, reviewing, deploying internal policies such as Acceptable Use, Incident Response and Data Destruction plans.
- ▼ **Data Loss Protection (DLP)**— Turn on basic rules to protect against transfer of personally identifiable information (PII) in Office 365 or Google Workplace.
- ▼ **Threat Locker**— Network access controls, group policy controls
- ▼ **Security Risk Assessments and Vulnerability Scans**— Assess how your technology environment compares to cyber security frameworks or compliance standards and best practices (ISO, NIST, HIPAA, PCI).

Add-Ons

Explore our **additional enhancements** to fine-tune your security solution, allowing you to customize and address specific security needs with precision.

- ▼ **Mobile Device Management**— Monitor and manage what's happening on mobile devices.
- ▼ **Single Sign-On**— Sign in to multiple applications with a single ID that is automatic, authenticated and secure.
- ▼ **Cyber QP**— Privileged access management (know and verify who has access to your network and data), self-service password reset, etc.
